

# Information Assurance

## Preemptive Cybersecurity

[www.gaits.com](http://www.gaits.com)

### Vulnerability Analyses/Intrusion Detection

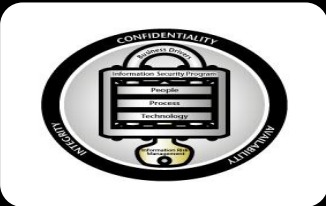

- Identify external and internal malicious behavior and potential data compromise
- Employ vulnerability assessment tools such as Foundstone and eEye Retina
- Leverage standardized enterprise-wide approach to security operations and managing computer security incidents

### Regulatory Compliance Support

- FISMA
- NIST Special Publication 800 series
- FIPS 199 and 200
- DoDD 8500.1, Information Assurance
- DODI 8500.2, Implementation Assurance Implementation

### Security Architecture

- Leverage GAITS Standardized Information Assurance Model (SIAM) to manage the migration of security architectures with automated inventory and asset control tools and that centralize security services and their management
- Partner with customers to develop a target security architecture and measure its migration and operation

### Certification and Accreditation (C&A)

- Support DITSCAP to DIACAP transition
- National Information Assurance Certification and Accreditation (NIACAP)
- NIST 800-53 and 800-37

## *We Bring Repeatable Security Operations Processes*

- Fully incorporates Confidentiality, Integrity, and Availability (CIA) Triad Model
- Employs a “big picture” view of security incidents and events to get out in front of vulnerability threats
